from the youth. The younger generation motivated by ideals and responsibilities are the future of mankind as well as the hope of the lofty pursuit of peace and development. China will work with FISU and all participating delegations to make the Chengdu Games a grand sports event that will present the charms of China, the vibe of our times and the beauty of youth, and facilitate mutual understanding among young people from around the world, so as to provide new impetus for the progress of mankind.

—We should carry forward the spirit of the World University Games to stand up to global challenges in solidarity. Sixty-two years ago, Dr. Paul Schleimer, founding president of FISU, described the World University Games as a gathering of friendship. This characterization, together with the values of friendship, fraternity, fair play, perseverance, integrity, cooperation and application championed by FISU, has not only guided the sports activities of university students around the world, but also inspired us to navigate the changes of the world, of our times and of the course of history. We should promote solidarity through sports, build up positive energy across the international community, join hands to tackle global challenges such as climate change, food crisis and terrorism, and shape a better future through cooperation.

—We should deepen exchanges and mutual learning to promote harmony without uniformity in the spirit of inclusiveness. Civilizations take different forms, making the world colorful and diverse. Young people are full of vitality. They can and should be able to view diversity from an equal, inclusive and friendly perspective, and see different cultures with an attitude of mutual appreciation and mutual learning. The Chengdu Games should be an opportunity for us to champion the common values of humanity and write a new chapter in building a community with a shared future for mankind.

Ladies and Gentlemen,

Friends,

In ancient times, the metropolis of Chengdu, known as Yi, was famous for its magnificent landscape and rich culture. This historical and cultural city has long been a hub of exchanges connecting China to the rest of the world, like a pearl on the southwestern Silk Road. Today, Chengdu is one of the most dynamic and happiest cities in China. Thanks to its inclusiveness, the city has continued to prosper economically and thrive culturally since it was founded over 2,300 years ago. I encourage you to tour the city, to experience and share firsthand the multifaceted manifestations of the Chinese path to modernization.

Now, I would like to propose a toast,

To the success of the Chengdu Games;

To solidarity and friendship among all peoples in the world; and

To the health of all distinguished guests and your families. Cheers!

Rising Economic Polarization in the United States: Truth and Facts

美国贫富分化持续恶化的事实真相

February 2023 2023年2月

Introduction

Being the largest economy in the world, the United States is also the most economically polarized among Western countries. It has long been stuck in the conundrum where the rich get richer and the poor become poorer. Since the onset of COVID-19, the United States has adopted massive fiscal and financial stimulus measures. However, these measures fail to address the fundamental difficulties facing the have-nots, but rather offer billionaires a chance to expand their wealth. Economic inequality has become even more prominent.

Through facts and figures, this report aims to reveal the current state of wealth disparity in the United States, the entrenched political and social causes behind it, and the implications of the problem.

I. Deterioration of Economic Polarization in The United States

Since the 1970s, income inequality and wealth disparity in the United States have continually deepened. The rich keep getting richer, the poor keep getting poorer, and the middle class is squeezed. Today, these perilous trends continue.

- ♦ The Gini coefficient, which measures inequality in income distribution, has kept rising in the United States. According to the World Bank, the U.S. Gini coefficient has gone up from 0.353 in 1974 to 0.415 in 2019, exceeding the alarming level at 0.4 indicating a large income gap. During the same period, other developed countries have largely kept their Gini coefficient below 0.35, or even 0.3 in some cases.
- ♦ In the United States, the wealthy population have enjoyed much faster income growth than the low-income group. According to the U.S. Census Bureau, between 1970 and 2020, the average income of the top fifth of families increased by 182 percent to 253,000 U.S. dollars, while the middle-income households and the bottom fifth saw their average incomes grow by just 133 percent to 72,000 dollars and 113 percent to 15,000 dollars respectively. In 1975, the average income of the top fifth was 10.3 times that of the bottom fifth. The gap widened to 17.4 times by 2020.

引言

美国既是世界第一大经济体,也是贫富分化最为严重的西方国家,长期走不出富者愈富、贫者愈贫的困局。新冠疫情暴发以来,美国采取大规模财政金融刺激措施,不仅没有从根本上帮助穷者纾困,反而助力亿万富翁借机扩大财富,贫富差距更为悬殊。

本报告旨在通过列举事实和数据,揭示美国贫富分化的现状、问题积重难返的政治和社会原因以及造成的影响。

一、美国贫富分化状况持续恶化

20世纪70年代以来,美国收入不平等和财富悬殊程度日益加深,出现"富者愈富、贫者愈贫"和"中产阶级遭挤压"的严重现象,这一趋势至今仍在延续。

- ◆反映收入分配差距的基尼系数不断攀升。据世界银行统计,1974年美国的基尼系数为0.353,到2019年已升至0.415,超过贫富差距过大(大于0.4)的警戒水平。同期其他发达国家基尼系数基本都在0.35,甚至0.3以下。
- ◆美国富裕群体的收入增速远高于低收入群体。据美国人口普查局数据,1970年以来,收入前五分之一家庭的平均收入增长182%,到2020年达25.3万美元,而中等收入和收入后五分之一家庭的平均收入仅增长133%和113%,到2020年仅为7.2万美元和1.5万美元。1975年,收入前五分之一家庭的平均收入是后五分之一家庭平均收入的10.3倍,到
